

氏名	11	12	13	14	15
1 鈴木 里帆	Pressure and temperature	LOCALIZATION	Feature detectors in the cortex	Color and brightness constancy	Controlled stimulation
2 高橋 千晶	(割当量調整のため1回飛ばします)	Grouping of objects	Later stages of recognition: network models	Shape constancy	Active perception (CHAPTER 5の終わりまで)
3 長島 聡之	Pain	Perceiving distance	Networks with feedback	Illusions	
4 奈良 由美子	Nonstimulus determinants of pain (CHAPER 4 の終わりまで)	Monocular cues	The importance of context ..., you will tend to see the ambiguous pictures as a young woman.	The Ames room illusion	
5 西川 友理	CHAPTER 5: PERCEPTION	Perceiving motion	Context effects and top-down processing also occur with letters and words, and play a major role in ...	DIVISIONS OF LABOR IN THE BRAIN	
6 原 匠太郎	WHAT IS THE USE OF PERCEPTION?	Real motion	(割当量調整のため1回飛ばします)	The visual cortex	
7 細田 洋志	Five functions of perception	RECOGNITION	Special processing of socially relevant stimuli: face recognition	Recognition versus localization systems	
8 松永 拓	ATTENTION	Global-to-local processing	Failure of recognition	PERCEPTUAL DEVELOPMENT	
9 八木 綾子	Weapon focus	The binding problem: pre-attentive and attentive processes	ABSTRACTION	Methods of studying infants	
10 矢嵐 翠	Attention, perception, and memory	Problems with feature integration theory	PERCEPTUAL CONSTANCIES	Perceiving depth	
11 0
